
Ariana Zeivald

2D Artist / Illustrator
Frontend Developer

Email: lisadikaprio@gmail.com
Website: arianazeivald.com

About Me

- game developer with experience in agile teamwork and project delivery under tight deadlines
- love experimenting with new tools and artstyles
- published multiple web-based games and 2D game assets on my personal itch.io page: lisadikaprio.itch.io
- other hobbies include crafts (crochet, knitting, embroidery etc), reading (sci-fi, non-fiction, graphic novels) and gaming

Work Experience

Software Developer

Wegesrand GmbH & Co.KG, Remote - September 2024 - February 2026

- contributed to the development and maintenance of multiple serious game projects, implementing new features and supporting live systems throughout the production lifecycle
- collaborated closely with developers, artists, designers, and QA testers to build, test, and ship interactive experiences under tight deadlines
- worked across backend and frontend systems to integrate new features, fix bugs, debug legacy projects, and ensure stable deployment and operation of game services

Student Internship

Edutastic Games, Remote - October 2022 - March 2023

- development of the single- and multiplayer browser game Geotastic
- UI/UX Design of website pages based on user feedback
- designing and implementation of 2D game assets, f.e. player cards, sponsor banners and icons

Education

Game Design - Bachelor of Arts

Hochschule für Technik und Wirtschaft, Berlin - October 2019 - September 2023

- primary focus on Game Development in teams, as well as web development and creation of 2D and 3D game assets

Highschool / General Higher Education Entrance Qualification (Abitur)

Johann-Gottfried-Herder-Gymnasium, Berlin - September 2017 - June 2019

Skills

- 2D illustration and asset creation using traditional media, as well digital tools, specifically Adobe Photoshop, Krita and Paint Tool SAI
- vector asset creation using Figma
- creating UV textures for 3D objects using common 2D drawing tools, as well as Substance Painter
- implementing 2D game assets and UV textures for 3D objects in game engines Unity and Unreal Engine
- UI/UX Design for interface layouts, as well as collaboration using Figma and Miro
- Version Control using Git and Github for game development
- creating animated 3D assets in Maya and Blender, as well as implementing them into game engines Unity and Unreal Engine
